

Puppy Guarantee

Every effort has been made to assure that the puppy you have purchased is healthy at the time of purchase. To keep this guarantee enforced you must have your puppy examined by a licensed veterinarian of your choice within 48 hours from the date of purchase. During the initial examination, should your veterinarian find This puppy to be a poor health risk or detect any physical health problem that requires further extensive veterinary care other than the required vaccinations and/or treatment for any type of parasite or bacteria, internal or external, you must contact me IMMEDIATELY. A diagnosis of coccidiosis, giardia, parasites or any other type of bacterial infection does not render your puppy unhealthy. Your guarantee does not cover the above conditions. No veterinary services will be paid for the initial exam or for the following examinations. Should you neglect to take this puppy for this examination, you accept immediate and full responsibility for its health.

In accordance with the above, we also guarantee your puppy for seven days from the date of purchase against parvo, distemper, hepatitis and canine influenza. In the event your puppy does not pass its initial exam or should contact any of the above you must notify us immediately. The puppy and all related paperwork must be returned to the seller along with a legibly written and signed veterinarian report, complete history, a lab report and/or pathology report from a licensed laboratory. If your puppy is diagnosed with parvo, an IGG and IGM Blood Antibody Titer Test must be done with the results furnished to the seller. We will replace your puppy with the first available puppy of equal quality, however no part of the purchase price will be refunded.

There is no guarantee of breedability, show quality, size, coat quality, temperament or adaptability. Veterinarian check-ups and vaccinations must be kept current for any warranties or guarantees to be valid. No other guarantees and warranties, have been made, either expressly or implied. Exceptions to this are those discussed previously (by phone, email or in person) as any knowledgeable breeder knows that not all expectations hold true upon maturity.

The seller accepts no responsibility for hypoglycemia, which is a condition brought on by stress. Symptoms have been explained to the purchaser.

Health record and veterinary health check has been provided to buyer. All shots and worming are current. Vaccine is PROGUARD 5 by Intervet and Nemex II and Ivermectin used for worming.

Any deposits made on any puppy are NOT refundable for any reason.

Buyer has read and understands the puppy guarantee and acknowledges that there will be no cash refund and that there will be no reimbursement for veterinary fees.
